

## Preparation for CompTIA RFID+

RFID CoE – Training Center

CompTIA

### Description

Developed for professionals requiring training in RFID together with an international certification, the RFID Center of Excellence offers training in **Preparation for CompTIA RFID+**. By means of a wide set of tests discussed by highly trained professional, this course presents topics covered by CompTIA RFID+ certification exam, providing participants the opportunity to be properly prepared to carry out an international certification. By the end of the course the students will be prepared to face the challenge of a professional certification exam.

### Purposes

- To provide solid grounds to understand the environment and engineering principles of RFID, for the certification exam.
- To show the concepts covered in the CompTIA RFID+ certification exam, in a practical and real environment.
- To properly prepare the students to face an international certification.
- To simulate a certification examination in RFID and its specificities.

### Target Audience

Targeted at engineers, system analysts, and technical professionals involved in processes related to developing, deploying, and operating RFID in companies, and searching training to implement RFID projects together with a certification with international recognition.

### Topics Covered

- Radio-frequency Concepts
- Antennas
- Tags
- Reader
- Middleware
- EPCglobal Network
- RFID Peripherals
- Standards and Regulations
- RFID Applications
- Internet of Things

### Methodology

- With duration of 16 hours, the course **Preparation for CompTIA RFID+** ensures a perfect balance between theory and practical tests, discussed by highly trained professional certified in RFID.

### Pre-requisites

Knowledge in:

- RF Physical Basics
- RFID Basic Terminology
- Highly suggested certification in **RFID Implementation**, by RFID CoE

**This course includes a voucher to the CompTIA RFID+ certification exam.**

(the certification exam can be done in any place in Brazil, by appointment, or with the official partner of RFID CoE, in São Paulo).

## **Why to join**

- To expand your field of action and improve your career in certifications.
- To obtain validation of your knowledge, technical skills, and competence in the RFID area.
- To gather new information suited to be able to understand this new technology and its applicability.
- To know the tools and solutions available in the RFID area.
- To qualify to act in this new fast-growing environment.
- To transform the knowledge acquired into competitive edge to your company.

## **Location**

Course offered exclusively in RFID CoE (Sorocaba/SP). A customized version can be offered on site.

- RFID CoE is the only lab in Brazil certified by EPCglobal, a regulating agency of international standards to adopt and develop the RFID technology worldwide;
- RFID CoE is the only center in Brazil focused exclusively on the study of the RFID technology, being able to share the most recent global initiatives related to the RFID technology.

## **Information and registration**

Information and registration can be obtained by e-mail [hp.rfid@hp.com](mailto:hp.rfid@hp.com) or through the site [www.rfid-coe.com.br](http://www.rfid-coe.com.br).
